Retail Tech & E-Invoicing Compliance

Automated Stock Management & Compliant E-Invoice Preparation for Malaysian Retail SMEs

PRESENTED BY

PROMPT MASTERS

TARGET AUDIENCE
Micro & Small Retail Merchants

COMPLIANCE FRAMEWORK
MyInvois E-Invoice Readiness

DEPLOYMENT
Orbyte Platform Compatible

INSTITUTION
Universiti Malaya

THE PROBLEM

Operational Friction in Retail SMEs

Paper & WhatsApp Chaos

Small shop owners rely on messy, fragmented channels like paper notebooks, unorganized WhatsApp chat logs, and disjointed spreadsheets.

Prohibitive ERP Costs

Traditional enterprise ERP software is far too costly, bloated, and complex for micro-merchants to license, configure, and maintain.

E-Invoicing Anxiety

Imminent national e-Invoicing mandates create heavy operational burdens for small businesses lacking dedicated IT or accounting teams.

THE SOLUTION

Introducing Entre Master

Zero-Learning Curve Simplicity

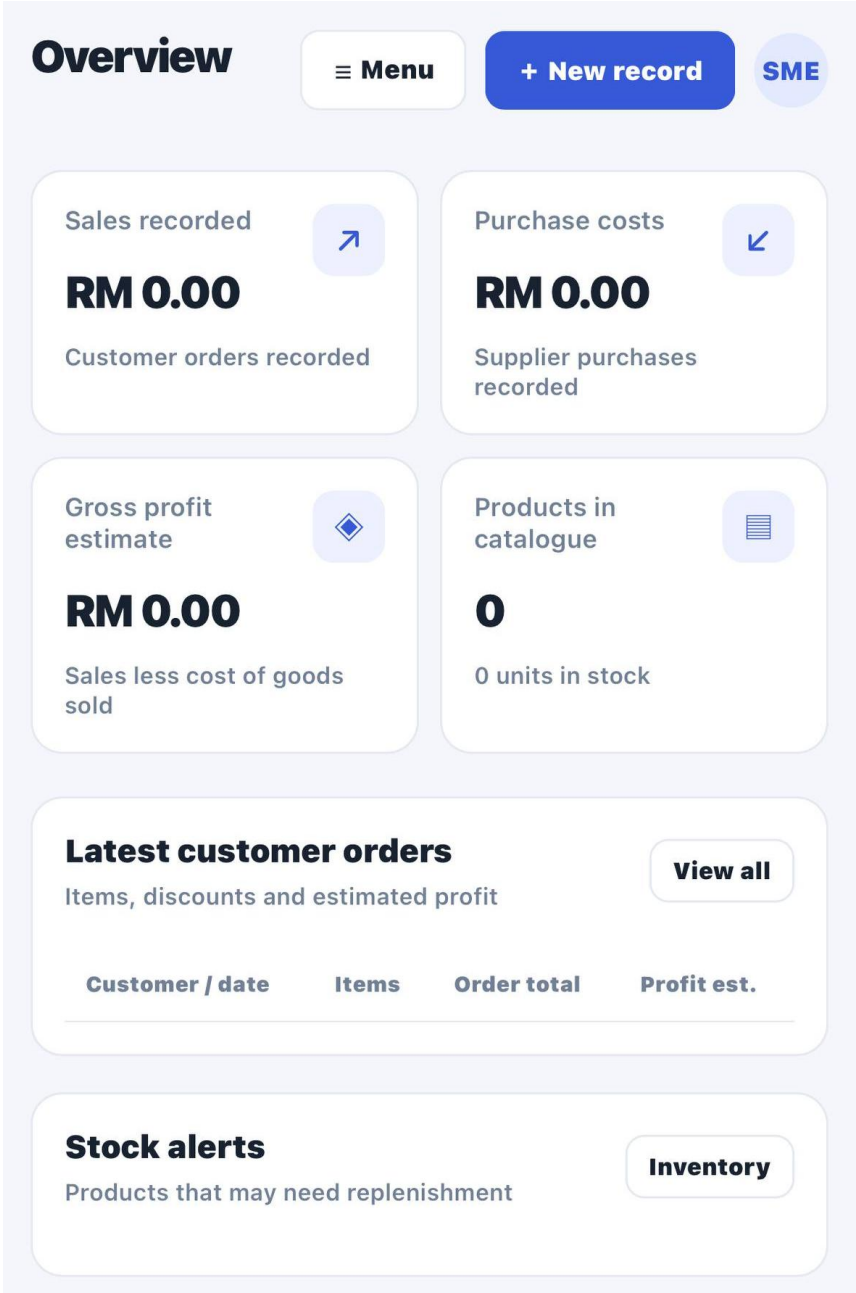

Designed specifically for non-tech-savvy shopkeepers—no steep learning curve or training required.

Unified Stock Catalog & Ledger

Consolidates product catalog, supplier intake, customer sales, and active SKU tracking in one place.

Automated E-Invoice Drafting

Pre-formats sales data into MyInvois-compliant XML/JSON drafts instantly upon review.

THE SOLUTION

EntreMasters is Our Answer

Easy to use — no training needed.

Everything in One Place

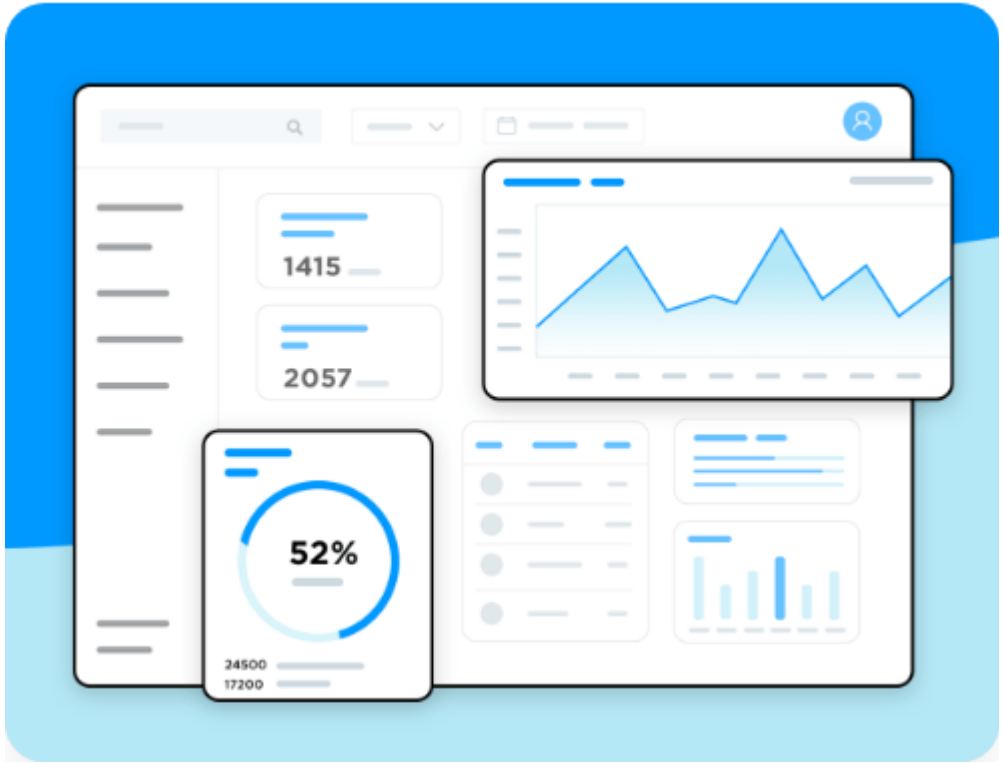

Centralize your product list, stock records, sales history, and e-invoice drafts in one seamless system.

Automated Draft Creation

When you make a sale, the system automatically creates a properly formatted e-invoice draft ready for review.

Check and Go Efficiency

Eliminate manual typing errors completely — simply verify the generated details and move forward.

AUTOMATION MODEL

The 5-Step Closed Automation Loop

STEP 1

Trigger

Event occurs: Low stock threshold reached or supplier invoice received.

STEP 2

Query Data

System automatically pulls SKU records, pricing, and historical reorder levels.

STEP 3

Calculate & Judge

Software computes item totals, SST mappings, and recommended stock adjustments.

STEP 4: CRITICAL GATE

Human Approval

Merchant reviews and confirms generated details. System never auto-executes without consent.

STEP 5

Record & Audit

Permanently updates inventory ledger and generates formatted e-invoice draft.

FUNCTIONAL ARCHITECTURE

Core Features & Functional Breakdown

Product Catalog

Centralized inventory management module allowing rapid SKU creation, barcode tracking, and active group counting.

Key Capabilities:

SKU indexing • Low-stock thresholds • Category grouping

Transaction Ledger

Searchable, real-time audit log recording supplier intake orders and customer retail sales transactions.

Key Capabilities:

Historical search • Intake vs Sales logs • Permanent timestamps

E-Invoice Draft Engine

Automated compliance generator converting sales entries into structured MyInvois XML/JSON draft schemas.

Key Capabilities:

Compliance readiness • Sandbox validation • One-click drafts

INTERACTIVE FLOW

Demonstration Sequence & Human Approval Gate

REPLIT LIVE APP

Interactive Transaction Flow

1. SELECT ACTION

Choose Stock Intake or Sale

2. CHOOSE SKU

Pick item from catalog list

3. INPUT QUANTITY

Enter units & unit price

4. AUTO-COMPUTE

System calculates totals

STEP 5: MANDATORY GATE **Merchant Review & Approval**

Human Must Approve Rule: Machine never makes automated accounting or submission decisions without explicit merchant confirmation.

6. UPDATE LEDGER

Write transaction to database

7. GENERATE DRAFT

Structure MyInvois draft format

8. REFRESH STOCK

Sync remaining stock counts

BUSINESS VALUE & IMPACT

Value Proposition & UN SDG Alignment

~80%

Time Saved in Stock Logging

Reduces daily manual ledger entry and math verification from hours to minutes.

100%

Calculation Error Elimination

Automated total and SST mapping eliminates human arithmetic mistakes in invoices.

Orbyte Platform Readiness

Architected for modular deployment within the Orbyte platform ecosystem, enabling seamless multi-shop scaling and standardized tenant integration.

UN SDG 8 Alignment

SDG 8.2: Technological Upgrading

Achieve higher levels of economic productivity through technological innovation.

SDG 8.3: Support MSME Growth

Promote development-oriented policies that foster micro-merchant formalization.

SAFETY & GUARDRAILS

Compliance & Safety Red Lines

PDPA Data Privacy

Built strictly using synthetic/mock test data. Zero real customer PII or unencrypted sensitive merchant records are stored or exposed.

Rule: Synthetic Datasets Only

No Direct Financial Tax Filing

Acts strictly as a front-end helper and draft organizer. Avoids direct automated bank transfers or official government tax submissions.

Rule: Draft Preparation Only

Clear Scope Boundary

Does not duplicate existing HR or enterprise admin functions already provided by core platform infrastructure.

Rule: Focused Inventory & Draft Scope

FUTURE HORIZONS

Development Roadmap

PHASE 1 (CURRENT)

Core Inventory & Draft Engine

Functional MVP with stock catalog, ledger tracking, and automated MyInvois draft generation.

Hackathon Delivered

PHASE 2 (NEXT)

WhatsApp Order & Push Alerts

Automated WhatsApp text order parsing and proactive low-stock push notification alerts.

Q1 Target

PHASE 3 (SCALE)

Advanced Forecasting & Multi-Outlet

Predictive demand forecasting, multi-outlet management, and customized industry templates.

Q2 Target

Thank You!
